

Born of Honeycrisp & Fuji. SWEET, JUICY, AND CRUNCHY.

Evercrisp is the result of good old-fashioned crossing of two favorites.

You get the sweet and juicy of Honeycrisp and the firm crunch and storability of Fuji.

What makes Michigan apples so tasty?

Lake Michigan! They're grown on the west side of the state so they get all the benefits of the climate – the sunny days, cool nights give the sweet and crisp bite.

Support our farmers! Know when you purchase Evercrisp from Riveridge, you are selecting an apple grown on a family orchard. Some in their 6th and 7th generation. How about them apples?
